

ALLIANCE FOR RESEARCH AND INNOVATION HEALTH INDUSTRIES

Marc Bonneville

ariis chairman

Scientific and Medical
Director - Mériex Institute

The response to the major health challenges facing our societies, whether related to the demographic transition, the climate or environmental crisis, is based on the commitment of all public and private stakeholders to accelerate the development of breakthrough solutions that improve prevention, diagnosis, treatment and the efficiency of our healthcare systems.

It is with this in mind that for almost 15 years, ariis has been mobilizing pharmaceutical, diagnostic, medical device and digital companies, in close partnership with FEFIS and public research institutions, in order to promote exchanges and catalyze collaborations between public and private stakeholders in health research and innovation. Health Innovation.

The many actions carried out in 2024 attest to the dynamism, versatility and responsiveness of the Alliance. In addition to its historical commitment to organizing major international conferences, such as the HYBRID conference on "Next Generations of Gene and Cell Therapies" held at the beginning of the year and mobilizing more than 300 participants, ariis organized numerous exchanges between its members and public stakeholders in the innovation ecosystem, and several visits to sites and research platforms of excellence. It also continued several actions in the field of digital health, particularly in close collaboration with the Agency.

The organization in 2025 with Inserm of a new edition of the Cohort Innovation Day and the prospect of new actions resulting from the collaborations established with the recently created Inserm Health Research Program Agency should further enrich ariis's roadmap for next year. These are all new challenges that will require your support and your commitment, and which I hope will fully meet your expectations.

Marc Bonneville, Chairman of ariis.

OUR MISSIONS

FEDERATE

Coordination of taskforces and events to respond to future health challenges

SUPPORT

Understanding the organization of academic research in France

BUILD

A trusted third party in public debates and consultations

OUR TASKFORCES 2024-2025

The members and affiliates of ariis are committed to collaborating within internal working groups, or by contributing to cross-sectoral think tanks and working groups that bring together public and private stakeholders.

INNOVATION DOESN'T HAPPEN IN ISOLATION, BUT IN A GROUP

CENTERS OF EXCELLENCE

In 2023, ariis conducted a consultation on the feedback from public-private partnerships and published a guide on public research for its members. In 2024, this work continued with a meeting on ANR industrial chairs and visits to research centers of excellence during Learning Expeditions.

NEXT GENERATION OF CLINICAL RESEARCH AI, IN SILICO AND EXTERNAL ARM : TIME TO MAKE THEM REAL

The Health Innovation Agency and the F-crin clinical research network brought together a group of experts on new clinical trial methodologies. ariis and its members participated in the discussions and reflections, as well as in organizing the feedback day at the Lille University Hospital on June 24, 2024.

AI & HEALTH : USE CASES AI & RARE DISEASES

The contribution of AI to healthcare remains a major topic of interest for ariis members. The alliance continues to support the AI & Health program of the industry's strategic committee. Around the "AI and Rare Diseases" use case, a collective has come together to demonstrate the contribution of AI to reducing diagnostic errancy.

PRESENTATIONS AT THE PLENARY COMMITTEE IN 2024

CONTRIBUTIONS & DELIVERABLES

2024 CONTRIBUTIONS

- MARCH**
 - Senate Social Affairs Committee
 - Roundtable on Artificial Intelligence and Health

- APRIL**
 - Participation in the consultation for the biobanks roadmap led by Inserm, CNCR, RESPIC, and France Universities

- JUNE**
 - Mobilization of our members in the working groups of the Inserm Health Research Programs Agency

- OCTOBER**
 - Bpifrance's BIG
 - Roundtable: AI for the discovery of new drugs

2024 DELIVERABLES

- Public-private collaborations: ariis's contribution to the mission of Manuel Tunon de Lara & Anne-Marie Armanteras on the renovation of biomedical research - report submitted to the ministers in May 2024

- For the use of real-world health data in clinical research, status report, analysis, and recommendations - ariis's contribution to AIS - Fcrin's work

- The health revolution through data: public consultation by the Digital Health Delegation on building the health data heritage

- How to support the use of AI in clinical trials in France? White paper from the November 21, 2024 AI for Health Summit workshop, collective contribution

2025 PROGRAMMING

ARIIS 15 YEARS CELEBRATION

In 2025, ariis will celebrate its 15th anniversary, marking a decade and a half dedicated to collaborative innovation between the health industries and public research. This anniversary will be an opportunity to reaffirm our collective commitment to catalyzing synergies among health stakeholders and enhancing the attractiveness of French research on the international stage. [Follow our journey on our social networks.](#)

COHORT INNOVATION DAY

Cohort Innovation Day (CID) is an international conference dedicated to highlight French cohorts of excellence. In November CID 2025 edition will be organized with Inserm and Medicen to promote privileged exchanges with the health industries. CID is a unique opportunity to strengthen collaborations between the socio-economic world and French cohorts in the service of health innovation.

2025 PROGRAMMING OF MEETINGS WITH RESEARCH STAKEHOLDERS

- Learning Expedition
- Webinars (on request and selection by ariis members)
- Quarterly plenary committees
- Exclusive meetings
